### **General Description of the GeODin Software**

GeODin is a program used for :

- lithological logs;
- well design logs;
- penetration logs;
- geophysical borehole logs;
- combined logs;

- storing borehole data;
- borehole location maps;
- borehole location maps with (simplified) lithologs;
- geological cross sections based on a trace line between boreholes or a projection of boreholes thereon;
- storing and presenting hydrochemical analyses (RECHLIN, PIPER, DUROV and Anion/Cation triangle diagrams).
